DEVELOPING PROJECTS

TODO List App   Aug 2023 - Sep 2023

Link   -   **https://todoapp-reactjs-05092023.netlify.app/**

- Developed a responsive TODO list application using **React.js**, incorporating **CRUD** operations for managing tasks.
- Implemented features such as adding new tasks, marking tasks as completed, editing task details, and removing tasks from the list.
- Developing techniques including component-based architecture, state management, and event handling.

Simple Calculator   Jul 2023 - Aug 2023

Link   -   **https://react-calculator01092023.netlify.app/**

- Briefly describe the purpose and functionality of your calculator application.
- Emphasize your use of **ReactJS**, useState for state management, and modular UI design with components.

FEEDBACK-UI Reviews   Mar 2024 - Apr 2024

Link   - **https://github.com/Sabeekrahmana/json-FeedbackUI/tree/master**

- **React JS** is used in the development of the ratings and reviews project and data store on **JSON** file.
- It's easy for users to rate and review this project.
- The user can change the reviews, ratings, and previews in addition to deleting them.
- Using hooks, we developed an API to link **PostMan** to a data storage system.
- Concepts like ES6, Context, hooks, properties, routing, etc. are used in this project.
